Envelope Folding and Sealing Machine

Champion[™]

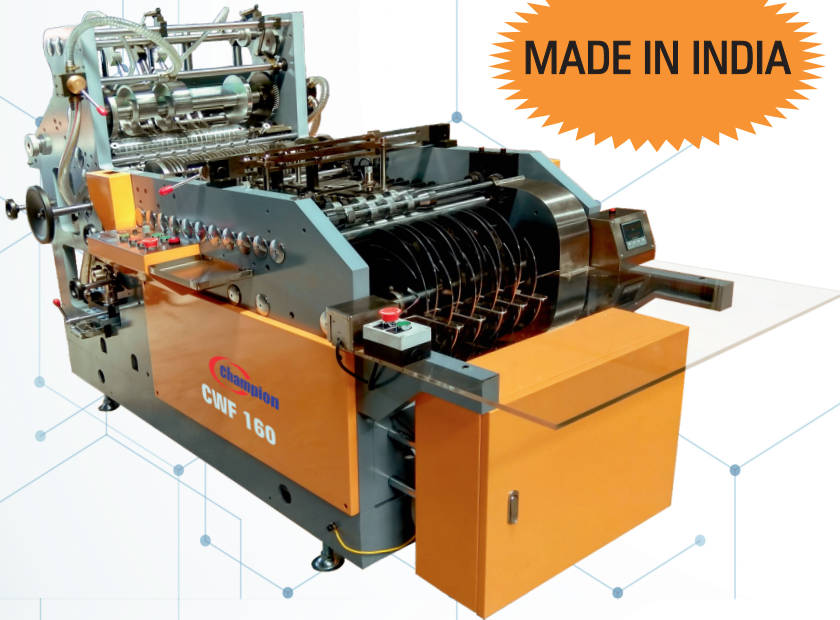

CWF-160

The CWF 160 pocket envelope folding and gluing machine is a compact solution ideal for the production of small size envelopes, to large size envelopes. The high speed feeding system, advanced rotary gluing unit, quick make ready, micro adjustment during production for better registration and the low capital investment makes it the preferred option for those entering the envelope manufacturing sector.

MADE IN INDIA

FEATURES

- High speed feeder for blanks and suitable for large size pocket envelopes.
- The advanced Rotary glue applicator ensures even application of glue.
- Equipped with counting and batching unit.
- Easy to set and operate.
- Micro adjustment is possible while running.
- High graded hardened helical gears for long run and hassle free running.
- Paper ejector to avoid paper falling into glue tank.
