# AUTOMATIC ENVELOPE MAKING MACHINE

## CF 250

The CF 250 automatic envelope folding and sealing machine is a high speed use friendly machine suitable for centre sealing and side sealing envelopes. The vacuum powered bottom feeding mechanism ensures consistent and continuous feeding of the envelopes. It has the characteristic of stability, precision and high efficiency. Easy make ready, user friendly operation interface and the compact design, makes it one of the favourite for the envelope manufacturing industry.

### KEY SPECIFICATIONS

- An ideal high speed user friendly machine
- Suitable for center seal or side seal envelopes
- Consists of Air suction bottom feeding system
- Stable and reliable automatic non-stop feeding operation
- Convenient and highly efficient uniform gluing system
- Economic and convenient operation

### SPECIFICATION

Working Speed	18000 pcs/hr
Paper thickness	60 - 120 g/m <sup>2</sup> Maplitho 70 - 170 g/m <sup>2</sup> Art paper
Specification of envelope	50 x 70 - 120 x 270mm
Weight of machine	900 kg
Main power required	5.5 kW
Dimensions (LxWxH)	1550 x 850 x 1300 mm

### PROCESS FLOW
